Easily transfer data between multiple Hard Disk formats
Are you looking for a convenient way to transfer precious data from one Hard Disk to another? Do you need to transfer data from different physically sized SATA drives such as 2.5" and 3.5" form factors?
The new USB-HDK-CR-E allows just that in one easy-to-use and completely trouble free design. Featuring a unique vertical 'dock' which allows any SATA I/II Hard Disk (either 2.5" or 3.5") to be connected into position. Featuring a powerful 'One Button' backup, allows data to be quickly and with minimal fuss to be transferred between the Hard Disk and the attached Computer via its high speed, Plug n' Play USB2.0 interface, eSATA Transfer Speed up to 3Gbps . Plus, also get the convience of a built-in 4-slot multi-format Card reader, reading most popular Memory Card formats.
